Valid Poster ID?
Is URL of referring site equal
to originator URL?
Store site URL
Update PP History
To 1018

Host Site

Remote User 1

Remote User 2

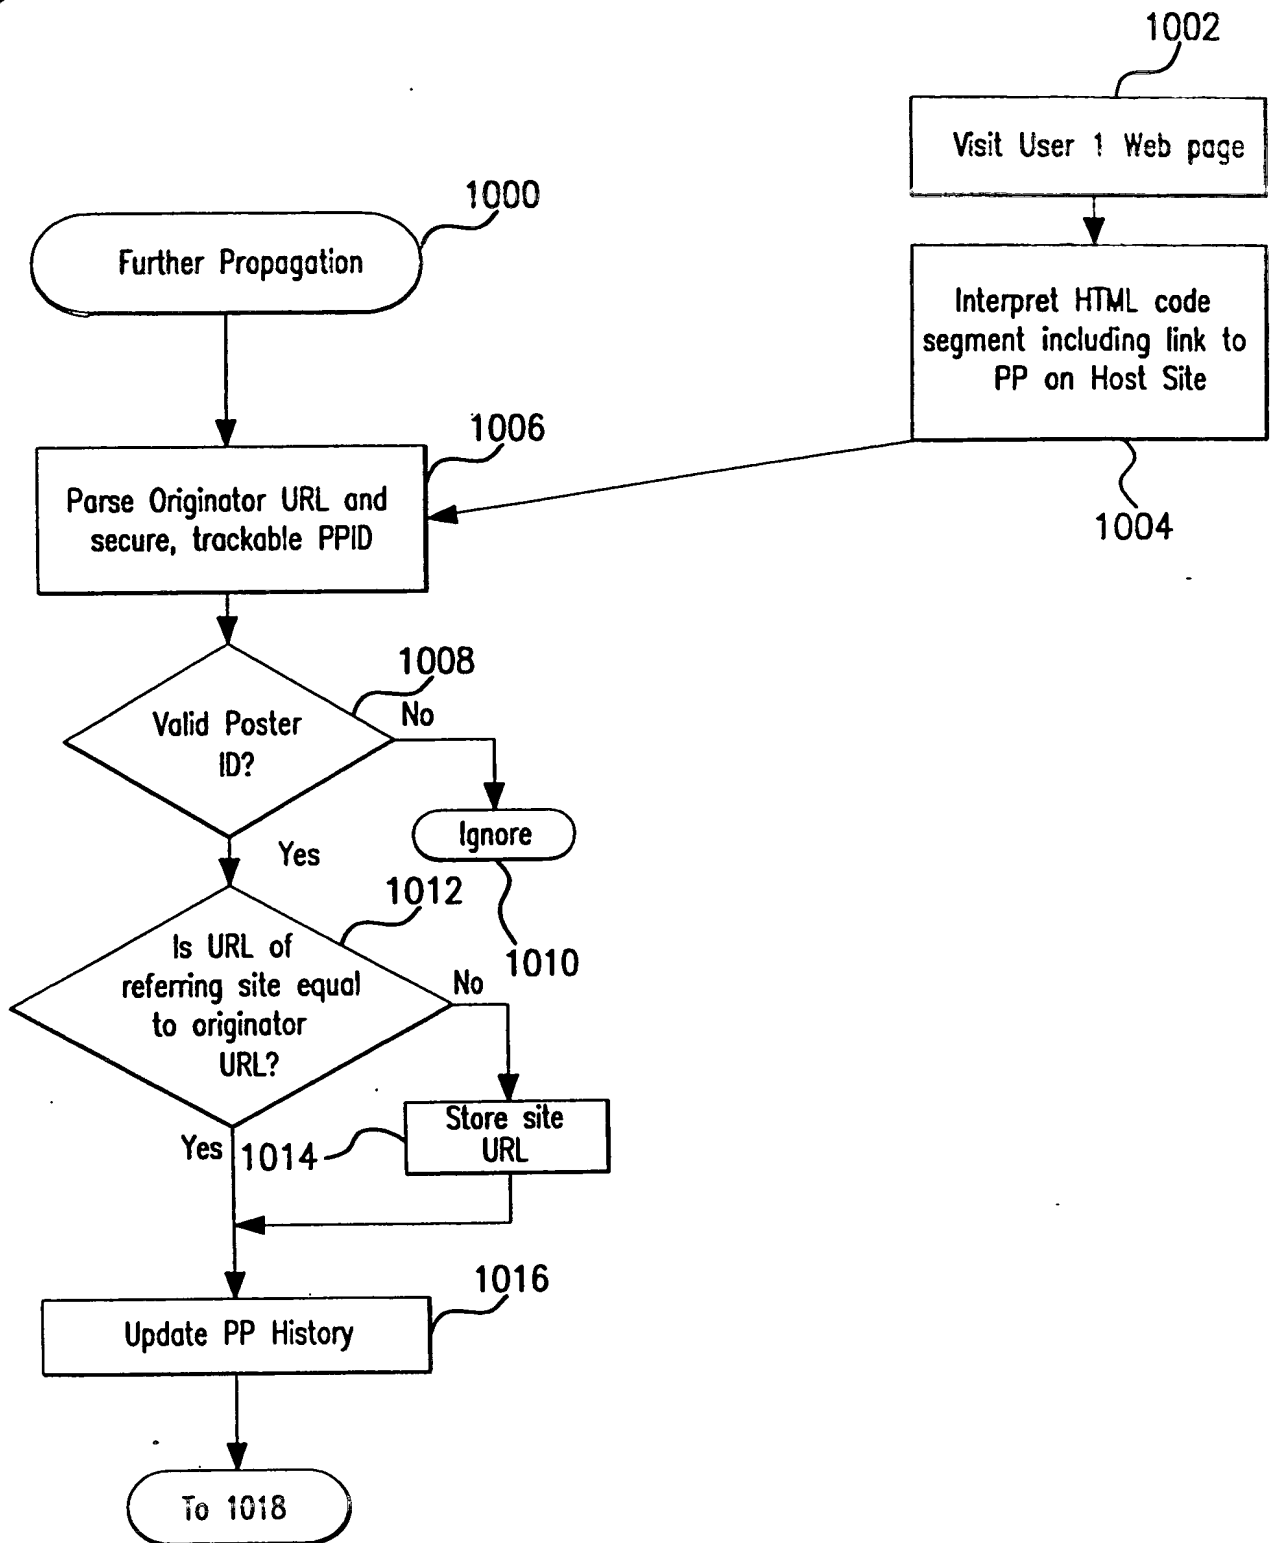

FIG.10A

Fig. 10B is a flowchart illustrating a method for propagating a remote configuration to a host site. The method includes the following steps:
1. A host site serves a PP Bit Map to User N.
2. Remote User 1 views the PP bitmap on the host site.
3. Remote User 2 selects a "Make Propagation Poster" area within the PP bitmap.
4. The host site receives the "Make Propagation Poster" selection screen space coordinates.
5. The host site converts the selection screen space coordinates to x,y coordinates in bitmap space.
6. The host site evaluates the x,y coordinates in bitmap space to determine if the "Make Propagation Poster" was selected.
7. If the selection was made, the host site initiates a configuration session.
8. If the selection was not made, the host site ignores or performs other processing.

Google Search

☐ Home ☒ About Google

Linking to Google

If you would like to allow Google searches from your web page, we welcome you to use the code snippet below for that purpose.

You can make any reasonable modification to the snippet, such as taking out the centering code, making the text box wider or narrower, or changing the background color (note, however, that the background for the Google logo is white, not transparent).

Here is the code:

```
<!-- Search Google -->
<center>
<FORM method=GET action="http://www.google.com/search">
<TABLE bgcolor="#FFFFFF"><tr><td>
<A HREF="http://www.google.com/">
<IMG SRC="http://www.google.com/logos/Logo_40wht.gif" border="0" ALT="Google"></A>
<INPUT TYPE=text name=q size=31 maxlength=255 value="">
<INPUT type=submit name=sa VALUE="Google Search">
</td></tr></TABLE>
</FORM>
</center>
<!-- Search Google -->
```

and here is what it looks like:

Google Google Search

If you would like to customize the search results to include your logo and reflect the look of your site, try Google's Free WebSearch service.

If you prefer to place a link to Google's homepage on your web site, we have an assortment of logo sizes available for this purpose.

Linking to Northern Light

Adding a link to Northern Light from your web page is easy. Just follow these steps.

1. Choose one of the logo or search bar options from the list below.
 - o The logos provide a link to the Northern Light home page.
 - o The search bars allow you to perform a search on Northern Light directly from your Web page. Search the entire Northern Light database, or use one of the specialized search bars to narrow your search to focus on a particular subject area.
2. Cut the corresponding HTML for your choice and paste it into your Web page.

Method, System and Computer Program Product for Searching and Retrieving Data from a Database

Get: [HTML for the Active Logo](#)

Active Logo with Text

This example is simply the short logo and a line of text underneath. Both are links to Northern Light's main search page. They are placed in a table to make the two elements a single discrete element that can be placed on your page.

Example:

[Northern Light Search](#)

HTML code:

Get: [HTML for the Active Logo with Text](#)

Northern Light Search Bar

Search Northern Light's entire database of Web and Special Collection Information.

Example:

Search for:

[Search](#)

[Tips](#)

HTML code:

Get: [HTML for the Standard Search Bar](#)

Power Search Pulldown Search Bar

A search bar with the option to search within one of Northern Light's Power Search subjects.

Example:

Power Search

Power Search for:

All subjects

[Search](#)
